

Statement of Purpose

MCTS are specialists in trauma, therapeutic care, and organisational culture. We are experts in **creating connections that heal** through the evidence-based ATIC™ model of Attachment & Trauma-Informed Care.

A trusted provider to professionals, organisations, Local Authorities, and Health & Social Care partners through four different services.

Expert Witness Service

Service: We provide personalised, trauma-informed assessments by qualified professionals, and reports that are court-ready, easy to understand, and straightforward to apply in everyday situations.

Purpose: To increase the usefulness of court-ordered psychological assessments, improving the experience of individuals being assessed and giving greater applicability for commissioning authorities.

Therapeutic Care Packages

Service: Working with independent care providers who want to deliver specialist, therapeutic care. They provide the care; we provide the clinician, the support and supervision, and an evidence-based Attachment and Trauma Informed Care model.

Purpose: To enable independent care organisations to offer trauma-informed care and recovery to young people, and improve staff retention and wellbeing through developing and delivering an integrated clinical model.

Consultation

Service: Trauma-informed and relational training and consultation for organisations including health and social care, social workers, police, hospitals, schools, and non-care related businesses.

Purpose: To support organisations and teams to become more relational with each other, their customers, and service users. This is achieved through the lens of attachment, trauma, and psychoeducation.

Training

Service: Providing CPD and training for professionals, leaders, managers, and teams.

Purpose: To provide trauma-related qualifications and CPD to professionals, leaders, managers, and teams and increase learners' knowledge and expertise.
